Thank You for choosing the Dowdeswell Audition, which will be yours if you purchase our product. The Dowdeswell Audition is more than a simple linear editor, it's a complete suite of audio editing solutions on a single platform. A versatile application, the Audition has the power to perform a variety of functions, including sound normalization, equalization, noise removal, gain reduction, pitch correction and more. You can use the Audition to process and save audio files as you wish, with options for WAV, MP3 and OGG, as well as Apple Loops and MIDI files. Meanwhile, the Audition can be used to adjust the way music sounds. The Audition's functionality is enhanced by its integrated Audio Levels control, which enables users to control volume levels from 0-100% and set-up curves for the best results. This flexibility can be useful for everything from quieting distracting sounds to enhancing the fullness of bass. The Audition also enables users to add effects and re-arrange audio tracks by dragging and dropping and use the powerful audio-mixing interface to fine tune the processing of each track. The Audition comes with a collection of pre-loaded sound effects (many licensed via free public domain tracks), ensuring it's easy to add professional quality audio to your compositions. You can also employ audio effects, including delays, reverb, and equalization to create unique and engaging results. The Audition has a built-in tempo feature that enables you to play, pause and control the speed of your audio playback. Furthermore, the Audition features an audio metering tool, with playback controls that adjust the volumes of the programs' sounds. The Audition provides also a great deal of dynamic options, including tempo, playback position, as well as loop, shuffle and repeat playback modes. You can even record
