There are 7 billion people living on Earth, and 1 billion active hackers. There are two types of hackers. There are hardware hackers, who store stolen information on the hard drive of their computer. There are software hackers, who are more dangerous. The software hacker tries to find a method to hack another hacker's system. At some point, the software hacker may decide to become a wildman, which is a person or persons who are hired by or work for a hacker. Their main job is to be able to hack with something that they know nothing about. If you want to become the new wildman, then you need to be a software hacker." (c) : ©2013.
